

AMENDMENTS TO THE SPECIFICATION

Applicant presents replacement paragraphs below indicating the changes with insertions indicated by underlining and deletions indicated by strikeouts and/or double bracketing.

Please replace the paragraph beginning at page 3, line 3, which starts with "Software such as...", with the following replacement paragraph:

Software such as the Alohabob's™ PC Relocator software ~~marketed by Eisenworld, Inc., the assignee of this Letters Patent,~~ solves many migration problems by transferring all of the important aspects (the "user state" described *infra.*) of the source computer—including applications, preferences and settings, and data—to the target computer, while giving the user the option to leave behind potentially troublesome (to the target computer) aspects of the source computer. The software has a unique capability to scan and analyze the source computer, and to identify all information objects that can be migrated. The aforementioned Alohabob's™ PC Relocator software and others ~~marketed by Eisenworld, Inc.~~ are believed to uniquely transfer to the target computer during the migration process, the complete "user state" of the source computer comprising applications and data, user settings pertaining to both software installed on the source computer, the source computer hardware, and those pertaining to peripheral devices (e.g., printers, scanners, external drives, displays and others) coupled to, or expected or capable of being coupled to the source computer.
